III. MACROECONOMICS OVERVIEW

After a growth period in May, the VN-Index slightly decreased by 1.3% MoM to 1,245.32 in June. The average trading value decreased by 7.9% MoM to 19,786 billion VND (approximately 770 million USD). The adjustment in the second quarter of 2024 was mainly due to the intervention of the State Bank of Vietnam in mitigating the depreciation of the VND compare with the USD. However, in the first half of 2024, all three exchanges recorded positive increases. The VN-Index increased by 10.21%, the HNX-Index by 2.84%, while UPCoM increased by 12.06%. The banking sector led the VN-Index's rise in the first quarter with an increase of 20%. Subsequently, some sectors overtook banking in the second quarter of 2024 and led in the first six months of the year, in descending order: technology, consumer services, industrial, materials, and consumer goods.

V. MARKET OUTLOOK

We expect the upward trend to continue in the second half of 2024. However, the increase will not be as strong as in the first six months of 2024 due to several reasons:

- 1) Current valuations are no longer as attractive as at the beginning of 2024, therefore the potential for price increases is not large;
- 2) Higher interest rates and a weaker VND than expected due to the current uncertain global economic and political situation. However, we expect that the industrial and consumer goods sectors may benefit from increased production activities. Additionally, wage increases may benefit banks and consumer goods companies. Furthermore, geopolitical tensions and an increase in international tourists to Vietnam will help transportation companies grow in both volume and price.

Auditors' responsibility

Our responsibility is to express a conclusion on the interim financial information based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements No. 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not give a true and fair view, in all material respects, of the interim financial position, interim investment portfolio of the Fund as at 30 June 2024, and of the interim results of its operations, interim changes in its net asset value, transactions of fund units and its interim cash flows for the six-month period ended 30 June 2024 in accordance with the Vietnamese Accounting Standards, Vietnamese Accounting System applicable to open-ended funds and the statutory requirements relevant to the preparation and presentation of open-ended funds' interim financial statements.

Accordingly, the corresponding figures of the interim income statement, the interim statement of changes in net asset value, transactions of fund units, the interim statement of cash flows and the related notes to the interim financial statements are not comparable with those of the current period.

Our conclusion is not modified in respect of this matter.

22. FINANCIAL RISK MANAGEMENT POLICIES

The Fund is exposed to market risk, credit risk and liquidity risk. The process of risk management is critical to the Fund's continuing profitability. The Fund Management Company has designed a risk control system to ensure a sufficient balance between expected cost of risk and risk management cost. The Board of Management of the Fund Management Company continuously monitors the process of risk management to ensure a sufficient balance between risk and risk control.

The Board of Management of the Fund Management Company has reviewed and decided to apply the following risk management policies for the above risks:

22.1 *Market risk*

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises four types of risk: interest rate risk, currency risk, price risk and other price risk, such as security price risk. Financial instruments affected by market risk include deposits and securities investments.

(i) *Price risk of listed shares*

The Fund's listed shares are exposed to market price risk arising from uncertainties about future prices of investing shares. The Fund manages price risk by placing a limit on shares investments.

At the reporting date, the exposure to the Fund's listed shares at fair value was VND163,327,887,000. A decrease of 10% in these securities' market price could have an impact of approximately VND16,332,788,700 depending on whether or not the decline is significant or prolonged. An increase of 10% in the market price of the listed shares would increase the Fund's operating results by VND16,332,788,700.

22. FINANCIAL RISK MANAGEMENT POLICIES (continued)

22.1 *Market risk* (continued)

(ii) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in market's interest rate. Market risk due to changes in the Fund's interest rates is mainly related to the Fund's bank deposits. These assets are highly liquid and the Fund holds these assets not for speculative purposes.

The Fund Management Company manages interest rate risk by looking at the competitive structure of the market to obtain rates which are favorable for its purposes within its risk management limits.

The Fund Management Company believes that interest rate risk does not have a significant effect on the performance of the Fund as the Fund holds mainly demand deposits and term deposits under three (03) months at financial institutions.

(iii) *Currency risk*

Foreign currency risk is the risk that the value of financial instruments will fluctuate because of changes in foreign exchange rates.

The Fund was incorporated and operates in Vietnam, as such, its reporting and transaction currency is denominated in VND. The Fund is not exposed to foreign currency risk.

22.2 *Credit risk*

Credit risk is the risk that the counterparty participates to a financial instrument or customer contract will cause a financial loss for the Fund by failing to discharge an obligation as commitment. These credit exposures exist within financial relationships including deposits with banks and other financial instruments.

The Fund places bank deposits with well-known banks and credit institutions in Vietnam. Credit risk posing to balances of bank deposits is managed by the Fund's investment management department in accordance with the Fund's policy. The Fund evaluates the concentration of credit risk in respect to bank deposits and certificates of deposit is very low.

It is the Fund's policy to enter into financial instruments with reputable counterparties. The Investment management Department closely monitors the creditworthiness of the Fund's counterparties by reviewing their financial health, credit worthiness, interim financial statements and press releases on a regular basis.
